## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a container, classified in class 229, subclass 125.39.
  - II. Claims 9-14, drawn to an adhesive tape, classified in class 428, subclass 40.1+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because, as shown by evidence claim 1, the combination does not require the particulars of the third zone as defined in claims 9-14 for patentability and, with respect to claims 12-14, the combination does not require first and second tapes as set forth in claims 12-14 for patentability. The subcombination has separate utility such as to seal a different container such as an envelope or to tamper proof seal a closure such as on a diary.
3. Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the other Group, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
